

ARIZONA FACADE SOLUTIONS PVT.LTD

Company Profile

Arizona Façade Solutions Pvt. Ltd:

We take great pleasure to introduce ourselves as one of the leading Contracting , Designing and Consultancy Firm with an experience of 11 years Plus in the field of façade system and building products.

The Activities of **Arizona Façade Solutions Pvt. Ltd.** is preliminary related to the field of designing, manufacturing and erection of Aluminum Doors, Windows, Curtainwall Glazing, Structural Glazing, Aluminum Composite Panel & Solid Aluminium Wall Cladding and any specific types of Aluminum and Glass Work that you may require for your project. We are also into UPVC Doors & Windows with our works at Okhla, New Delhi. Brand Encraft / LESSO.

Our designers use their specialist skills to produce world class results .We believe that a high quality product and services attached is the cornerstone to building relationship with our clients.

Our craftsmen have adequate training, skills, experience and proficiencies to manipulate designs, fabricate and install with the highest standards of workmanship.

We in pursuit of technological perfection, assure to provide our best Quality Products to you at the most competitive prices with prompt and efficient after Sales Service.

All phases and aspects of a renovation, initial design concepts, the refinement of all details of design and the selection of all finishes and installations can be accomplished to your satisfaction.

We specialize in:

Structural Glazing

Aluminium Composite Panel Cladding

Frameless Glazing

Skylight / Domes / Canopies

HPL Cladding (Fundermax)

Glass & Steel Railing

Solid Aluminium Cladding

Aluminium Doors/Windows/Partitions

Aluminium Curtain Wall

Spider Glazing System

False Ceiling

Trunkey Interiors

Shower Cubical

UPVC

Products:

Arizona Façade Solutions Pvt. Ltd. is one of the foremost companies in India and endows complete customization of its product. The company is a renowned name in the field of the fabrication of high efficiency aluminium, steel, glass etc. Some of our products are given as below:

Curtain Wall Glazing

Metal and glass curtain wall systems have found growing favour in 21st century architecture. The curtain wall system has evolved rapidly over the last two decades, especially with respect to weather control performance. A curtain wall system is a lightweight exterior cladding which is hung on the building structure, usually from floor to floor. It can provide a variety of exterior appearances but is characterized by narrowly spaced vertical and horizontal caps with glass or metal infill panels. These systems provide a finished exterior appearance and most often a semi-finished interior as well. They are also designed to accommodate structural deflections, controls wind-driven rain and air leakages, minimize the effects of solar radiation and provide fire maintenance-free long-term performance. Most of today's metal curtain wall systems are constructed of lightweight aluminium.

Structural Glazing

Structural glazing systems incorporating spacers and adhesives are now a widely accepted glazing option and are used in a growing share of curtain wall, window and storefront installations. In fact, many people have come to regard structural glazing as the superior method of glazing. When properly installed, the structural sealant forms a continuous, waterproof seal against leakage and air infiltration. The sealant and spacer transmit wind load movement to the structure and withstand flexure, tension, compression and differential thermal shear stresses. Silicone resists UV, ozone and other environment exposures and does not take on a compression set or lose resiliency. While structural sealant generally carries a 20-year of exposure still demonstrate elasticity, adhesion and strength. The major issues that govern the design of structural glazing system are sealant performance and water infiltration structural design requirements, and the use of right type of glass. These requirements directly affect aluminium profile sizes, sealant widths and joint sizes.

Unitized Structural Glazing

Unitized structural glazing is a special type where modules --- typically one mullion bay wide one floor high --- are assembled and glazed offsite, and then hung on the exterior of the building. Engineering and tooling cost are high for this system, but they become cost-effective with repetition, so large projects are often done in this manner. This system comes pre-assembled; it is preleased at the factory and installed at site. In the process, it minimizes field labour and erection costs, and promises a shorter installation period than the stick system.

Aluminium Composite Panel Cladding

Aluminium composite material is made of low Density Polyethylene. The Polyethylene core is laminated between two high-strength coils coated aluminium sheets. Polyvinylidene Fluoride (PVDF) is a high-performance fluoropolymer architectural coil coating system from PPG Industries. ACP sheets can be easily fabricated (i.e. cut, bent, curved, drilled, grooved, punched and shaped) using common wood and metal working tools to suit specific design requirements.

Frameless Glass Door

Frameless glass partitions are a superb way to produce privacy or divide rooms without closing an area. We fabricate the frameless glass partitions by using clear glass, which is very popular with residential and commercial clients. Along with it, we also offer glass partitions for every application imaginable.

Aluminium Doors and Windows

We offer aluminium doors that are very durable and reliable. We have been offering the aluminium doors in various specifications by using superior grade of aluminium. They often show better efficiency and demand less maintenance. Moreover, such aluminium doors come with rust proof, corrosion resistant options and might be availed in reasonable prices.

UPVC Doors & Windows

We have delivered many landmark projects. Few of them are listed as below for your perusal.

LIST OF VARIOUS JOB CARRIED OUT BY ARIZONA FACADE SOLUTIONS PVT . LTD

<u>S.NO</u>	<u>PROJECTS</u>	<u>LOCATION</u>
1.	Denso India (R & D Center) Toyota Group, Japan	Manesar (Haryana)
2.	Maneksha Centre	Dhaulakuan, Delhi
3.	Pawan Hans, Helipad (DRAIPL)	Rohini, Delhi
4.	Asian Paints (Shapoorji Pallonji)	Rohtak, Haryana
5	Stellar	Gurgaon
6	Good Earth City Centre	Sec-50, Gurgaon
7	Aryan Residency	Greater Noida
8	Oiles India (Takenaka)	Neemrana (Raj)
9	Aar Aar Techno Plast	Manesar (Haryana)
10	Nitin Furniture	Kirti Nagar, New DELHI
11	NBCC (DRAIPL)(NKG)	Kidwai Nagar, Delhi
12	Gulshan Homes	Noida (Director Residence) Mr. Deepak Kapoor
13	Spectrum @ Metro Mall	Sec -75,Noida
14	Prexus Healthcare	Gurugram
15	GD-ITL Narthex Tower	Pitampura
16	K K Technocrts	Noida
